specialists in professional  
moving and handling equipment

# camel

**The CAMEL:** The CAMEL (Complete Air Moving Elevating Lift) is an air powered lifting chair to raise someone from a lying to a sitting position at the touch of a button. For storage and transportation, the CAMEL can be rolled into a compact sports bag and weighs only 6.5kg (14lbs).

- lifts up to 320kg (700lbs)!
- can be operated independently by the user
- eliminates dangerous manual lifting
- suitable for use indoors and out
- battery operated
- portable
- simple to use

# elk

**The ELK:** The ELK is a lifting solution favoured by paramedics internationally. Following the same principles as the CAMEL, the ELK offers a simple lift that is ideal in confined spaces. The ELK is an exceptionally compact and portable lifting device weighing only 3.6kg (8lbs). Perfect for lifting in bathrooms, doorways and other confined and awkward spaces.

- lifts up to 450kg (1000lbs)!
- can be used with the assistance of one carer alone
- suitable for use indoors and out
- battery operated
- portable
- simple to use

## What are the benefits of using this revolutionary lifting technique

Lifting individuals with one of our inflatable cushions offer several major benefits. The low air pressure inflation from our Airflo compressor offers an exceptionally strong lifting capacity that can support anyone in comfort, from the frailest individual to the

bariatric client. In addition, by lifting with air the weight of the equipment is kept to an absolute minimum and the need for heavy and cumbersome mechanical components is eliminated, making our lifting solutions both lightweight and compact.

## CAMEL and ELK accessories

### ELK stretcher bars

These bars can be fitted to a standard ELK to enable a prone person to be lifted on a stretcher. They can be fitted and removed as necessary.

### Handling belt & Slide sheet

These two optional accessories are available to assist with transferring and supporting individuals whilst using the CAMEL and ELK.
