Lateral transfer without lifting
No lifting required, staff back injury is reduced. The result can be savings on both worker’s compensation and insurance.

Lateral transfer without noise
Patients are not disturbed, annoyed or frightened by noise associated with airflow systems.

Over 300,000 Rollbords sold worldwide for over 30 years
A proven effective and widely accepted product in thousands of hospitals around the world.

Priced well below other technologies
You can purchase a Rollbord for every room in your facility at a fraction of the cost of mechanical devices.

Patient rides on a soft surface
Patient is comfortable with far less risk of skin tears, injury, bruising and agitation associated with transfers on slide sheets and plastic boards.

Rollbord bridges the “Gap”
Older airflow technology requires a bridge to cover gaps between surfaces. Slide sheet transfers across gaps are painful to the patient. Rollbord automatically bridges the gap and the patient feels nothing.

Available with FREE In-Service Video and e-Learning Module

Our Unique Patented Conveyor Belt action
Carries patient from surface to surface, powered only by a gentle “push”

Soft Foam Core - NO rollers

Lateral transfer without lifting

Also available:
**Disposables**
- Long: Part # 440.1000 80" x 24"
- Short: Part # 440.1400 57" x 20"

Our Ambulance Rollbord was designed specifically to meet the needs of Emergency Response Professionals, reducing back injuries AND workers comp costs.

**Anti-microbial treated material**
Infection control helps prevent MRSA and other infectious microbes, and is easily wiped clean.

**No air holes, No Velcro**
No place for microbes to hide.

**Folds in half, hangs on wall hook**
System is easy to store, takes up little space, and can hang conveniently in every room of your facility.
For medium duty transfer applications, McAuley Medical also offers this lower-price-point Blue Board.

Don’t be misled by imitators - insist on these features: Anti-Microbial • 2-Year Warranty • Anti-Static • MRI Safe • Flame Retardant

For light duty long-term care and home applications, McAuley Medical offers the budget H-LINE.

H-LINE 120
Part # 440.3120
47” x 18”

H-LINE 170, Part # 440.3170, 67” x 18”

SAMARIT Transglide
For Lateral Transfer
• Easy-glide surface
• Rubber grips on underside
• Durable HDP Construction
• Can bridge gaps up to 5”
• Radiolucent and anti-static
Small - 470.1140
Large - 470.1170

Handy Rollbord Accessories

Disposable cover sheet Inexpensive, disposable thin plastic cover protects Rollbord from soiling and provides an additional layer of infection control.
Comes in rolls of 50; two sizes available:
Small, part # 440.1400
Large, part # 440.1000 (for use on 70” boards)

Disposable Cover Dispenser and Hanger System

- FDA Approved Powder Coating
- Steel construction
- Can sit on a counter top (rubber feet included)
- Easy to wipe clean

Rollbord Disposable Cover Dispenser
Part # 440.1088

Rollbord Wall Mount Hanger
Part # 440.1086

Rollbord Door Mount Hanger
Part # 440.1087

The Scientific Evidence - Two Major Studies:

RIGHT: MEMIC, a leading New England Worker’s Compensation insurance specialist, recently completed a rigorous scientific evaluation of Lateral Transfer Devices to find the best solutions for reducing friction and lowering push/pull forces, and review non-motorized friction reducing devices used for Lateral Transfer. The results speak for themselves:

The surprising fact is that in three out of four of the categories, the Samarit Rollbord not only required the least force, but also required as much as 15% less force than the Air Assisted product! Once again the Samarit Rollbord proves to be the safest Lateral Transfer Device and, at about a quarter of the cost of air-assisted devices, the best value for your safe patient handling dollar!

For the complete details on these two important studies, visit www.mcauleymedical.com

BELLOW: Here are the results of a recent study by Andrea Baptiste, MA, OT, CIE, and Kay Steadman, MA, OTR, CHSP.

The results speak for themselves:

Ranked in order of least (1) to most (6) physically stressful or demanding.
The Original Air Flow Lateral Transfer System

100% compatible with Hovermatt and all other airflow systems

Ergonomical extended handles

1200 Watt Air Supply

Disposable single-patient-use mattress

5 Year Warranty

MRI SAFE!

Anti-Static Material

Made with pride in the USA

LIFT FREE SOLUTIONS

WWW.MCAULEYMEDICAL.COM
The ONLY air mattress that remains inflated and can be fine-tuned for individual comfort.

Environmentally Friendly
- Uses just 1/10 the electrical power of old airflow mattresses
- NO Laundry/Detergents required

See short in-service videos on our website.

Your patient remains on this revolutionary new surface throughout the entire patient flow.
The new McAuley Medical SuperLIFT Patient Lift and Transport System requires little or no patient handling, resulting in both improved patient comfort and enhanced infection control. The push-button powered SuperLIFT can easily handle 500 lbs., and its powered variable wheelbase provides exceptional versatility.

Since a hospital patient is in a supine position the majority of the time, we’ve designed the SuperLIFT to comfortably move and transport your patient in that position.

See short in-service videos on our website.
The versatility and finger-tip power control of the SuperLIFT will make your job a whole lot easier; when you add the transport capabilities, you have a product unlike anything else available, anywhere. With the push of a button you can easily lift 500 pounds. And with the push of another button you can spread one or both sets of wheels to maneuver in surprisingly tight spaces.

**Storage Options:**
- Stores over stretcher or bed
- Can stack three in the same space as one hospital bed
- Can maneuver in tight spaces where typical stretcher will not fit

**Features:**
- 500 lb. lift capacity
- Reduces caregiver injury
- Four-button hand control
- For use throughout your facility
- Infection control
- Patient comfort
- An important part of any Safe Patient Handling program
- The ultimate transport device
- Sheets are Radiolucent
- Several sizes available
Repositioning Aids

Slide Sheets
For Lateral Transfer and Repositioning

- Reusable
  - Can be laundered
  - Low-friction nylon
  - Tubular design
    - Small Part # 450.0070
      28” x 28”
    - Medium Part # 450.0100
      40” x 32”
    - Large Part # 450.1180
      40” x 50” (Shown)

- Disposable
  - 50 Sheet dispenser pack
    - Part # 2.01 (31” x 13” x 6”)
      - 13 lbs. Each sheet is 78” x 30”
    - Optional wall mount Part # 2.09
    - Optional door mount Part # 2.10

Glide Boards
For Seated Transfer

- Self-Glide
  - Part # 470.0050
    20” long
  - Tetra Glide
    - Part # 470.0863
      25” long
    - Curved
      - Part # 470.0012
        27” long
      - Great
        - Part # 470.0080
          31” long
      - Biggest
        - Part # 470.0102
          40” long

- Weight limit: 300 lbs.

Turn Plate
For Standing Pivot

- Easily hangs on wall or door
- Medical grade plastic
- Rubber grip on bottom
- Use on any floor surface
- Easy to wipe clean
  - Part # 450.0380; 15” Diameter

(Please note: Turn Plate is shown being used with optional Gait Belt)

Rotating Seat Cushion
For Seated Pivot

- Can be used in car, chair or bed
- Breathable, wickable material
- Soft and comfortable
- Comes apart easily for cleaning
- Can be laundered
- 2-piece construction with low-friction interior surfaces
  - Part # 8.01; 15” Diameter

One-Way Slide Cushion
For Fall Prevention

- Slides back but NOT forward
- Maintains safe, secure posture
- Prevents fall-related injury
- Clearly labeled for proper orientation
- Soft, comfortable material; tubular design
- Can be laundered
- Can be used in car, chair or bed
  - Part # 450.4060; 18” x 16”

ABSOr and Caress Repositioning Slide Sheet System

- ABSOr Repositioning chuck w/ tuckable flaps. Part # G100
- Caress Fitted Slide Sheet. Part # G200

Features
- Remains under patient.
- Friction reducing material on the underside of pad to allow for repositioning and turning with minimal force required.
- Flaps that tuck underneath the mattress to lock the ABSOr slide in position.
- Protects patient, caregiver and mattress.
- Quick transfer of fluids from top layer to inner layers so patient does not feel wet. • Breathable.
Annual Safe Patient Handling Conferences

Bariatric Training Suit

Watch our web site for information about this year’s Conference, featuring, as always, impactful presentations, plus demonstrations and hands-on training by internationally respected experts and manufacturers in the field of Safe Patient Handling.

Bariatric Training Suit

Be prepared for patients of size. Train your staff on proper techniques for using bariatric equipment, proper equipment selection, and sensitivity training.

- Allows you to properly evaluate bariatric equipment before purchasing it
- Perfect training to handle patients of size
- Life-like features, size and feel
- Two piece design
- Easy to clean
- Fits on any average size person
- Staff Sensitivity Training
